

Environmental Policy

At Banbury Litho we are aware of our impact on the environment and are committed to preventing pollution and to continually improving our environmental performance. Twice a year we review our quality and environmental objectives and targets through our management review activity. We will ensure that every aspect of our activities is conducted in accordance with sound environmental practices and will fully meet all current environmental legislation in our effort to work towards an ISO 14001 certification.

We achieve this by:

- Seeking to work in partnership with the community by behaving in a considerate and socially responsible manner.
- Regular Internal audits of our Environmental Policy and system under ISO 14001.
- Minimising our printing waste through efficient and robust business processes.
- Minimising our waste to landfill through recycling.
- Avoiding the waste of energy, fuel and water.
- Investing in the development of new products and processes that have an improved performance regarding their impact on the environment.
- Ensuring that we meet and where possible exceed the requirements of environmental legislation.
- Ensuring effective and expedient incident control, investigation and reporting.
- Setting and reviewing environmental objectives and targets at our bi-annual Management Review meetings and ensuring that all employees understand, implement, maintain and improve them.

These policies are available to all employees on the company's notice boards and to the general public on this website. At least annually we review our quality and environmental objectives and targets through our management review activity
